

PAINT FINISHING

Doorsan's distinction lies in crafting exclusive products with a finish that stands apart from the market norm. Our commitment to longevity and durability ensures that our paint finishes not only enhance the aesthetics of our products but also make them more resilient.

Doorsets are available in semi-gloss paint containing resin which makes our finishes more durable for high-touch areas.

If you wish to talk to a Doorsan professional regarding painting requirements for a specific project, please call us on 0113 897 0984

PAINT FINISHING

Different finishes can be achieved by applying paint to a variety of substrates. Doorsan offers a wide range of paint colours, including those that match any Pantone or RAL standard. Below are some possible colors based on the German RAL standard. Please contact us to discuss your specific requirements.

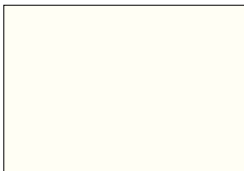

PAINTED

Applying primer and topcoats to a moisture resistant base creates a smooth painted door surface. Alternatively, doorsets can be supplied primed for brush finishing.

OPEN-PORE

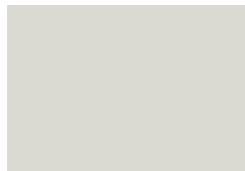

By painting directly onto Ash timber, the grain remains unfilled. This is known as an open-pore painted finish.
